ABOUT HILTI

At Hilti, we make and design leading cutting-edge technology, software, and services, empowering the professional construction industry. With a global presence in over 120 countries and more than 23,000 employees, we offer a 360 degrees service for your build – from software for design, products, and tools for work onsite to training, repairs, testing, and consultancy. We create technologies, software, and services, which are aimed to drive innovation and stand out from the competition. Our technologies are

known to support the achievement of many admirable feats in the field of engineering across the world. Our commitment to our customers is the epitome, and that is why two-thirds of our Hilti team members are focused on working directly with our customers every day. With our one-of-a-kind services, the industry's best warranty, and specialists in areas like structural engineering and fire protection, we have become a brand to be reckoned with among Construction professionals.

APPLICATION / Electrical

Our unique range of products, services, and software always come with personal, expert support. From design to demolition, our primary goal is to provide the right apparatus to help you perform your job impeccably.

LAYOUT / Electrical

Map your jobsite quickly, accurately, and efficiently with our remarkable measuring systems.

PM 40-MG

Easy and fast aligning - rotating platform with improved fine adjustment

- All the lines you need - 4 vertical and a 360° horizontal lines, bottom plumbing point.
- Green beam - 4 times more visible than red.
- Out-of-level and low-battery alerts – help prevent mistakes and unexpected downtime.
- Metal Blade Axicon technology – delivering outstanding, long-lasting accuracy.

PM 4-M

- Multi-line laser for precise and fast aligning, levelling and squaring.
- Centric design allows one-person layout.
- Fine adjustment dial for high-precision alignment.
- Out-of-level and low-battery alerts – help prevent mistakes and unexpected downtime.

LASER METER PD-1 (2nd Generation)

- Robust laser range meter for indoor applications and long distances up to 100 m.
- Enables quick and safe measuring in places where access is difficult.
- LEDs ensure zero errors through precise identification of measuring reference.

CABLE TRAYS / Electrical

Uncomplicate cable tray suspension with multiple fastening points for weight support. Our anchors, tools, and firestop make sealing large openings easy.

DROP IN ANCHORS / FLUSH ANCHORS / BULLET ANCHORS – HKD/ HKV

- Drop-in, flush anchors with international approvals.
- Available in carbon and stainless steel.
- Ideal for various suspended supports fixings in M&E cable tray fixing.
- Offers reliable setting & are available in various sizes.
- HKD - Lip for flush setting regardless of hole depth with ETA and fire approval.
- HKV - Knurling on the body, approved for concrete.

STUD ANCHORS

- HST3, HSA, HSV are the available stud anchors used for medium to heavy duty loads.
- HST3- Two embedment depths allow greater flexibility.
- HSA - Three embedment depths offer maximum flexibility and facilitate optimal utilization of concrete strength through high loads.
- HSV - Two embedment depths for a wide range of fastening thicknesses.

TE 3-ML

- Triple-mode SDS rotary hammer (hammer drilling, rotary-only drilling and chiselling) for multiple applications.
- Sturdy motor provides high performance and overload protection.
- Innovative, long-lasting hammering mechanism.
- Includes Hilti Cooltec with active cooling to extend tool lifetime.

TE 2-A22

- Cordless freedom with the performance of a corded tool.
- LED working light provides better visibility in dark areas.
- Best-in-class system durability backed by Hilti Lifetime Service covering the tool and accessories.

TE 4-A22

- Ergonomically designed D-grip for comfortable use over long periods.
- Robustly built and engineered specifically for high-performance cordless drilling.
- Electronic switch for precise hole-starting.

STAINLESS STEEL FIRESTOP COMPOSITE SHEET

- Ideal for seal large HVAC openings.
- Has customizable multi-board systems.
- Carries nonmagnetic properties thereby restricting any inductive loss in cables.
- Fully compatible with the Hilti Speed Sleeve and gangplate.

FIRESTOP BLOCK CFS-BL

- Non-curing, reusable solution for medium to large openings.
- Up to 4 hours fire resistance in test systems.
- Suitable for new penetrations or subsequent re-penetration with additional cables.
- Integrated grid technology reduces the use of wire mesh / coverplate making installation of the firestop block faster and cleaner.

FASTENING CONDUIT & ELECTRICAL BOXES

Electrical

Attach electrical elements with ease and efficiency with our direct fastening tools and our line of high-quality pins and mechanical anchors.

BX-3

Advantages

- Only battery powered tool with short stroke.
- ICC/ETA approval on nail with published load data in Fastening technology Manual with nail selection guideline.
- Hilti's first combustion-free direct fastening tool for driving nails into filled block, concrete and steel.
- High user comfort thanks to low compression force required, low noise and low recoil.
- Wide range of fasteners for quick, easy use on all suitable materials.

X-FB MX / X-DFB MX

- Friction-fit in the nose of BX/GX/DX nailers for easy handling.
- Bracing rib for high rigidity and a tight, secure hold on flexible conduits.
- Engineered for high-quality, reliable fastening

X-FB-E MX / X-DFB-E MX

- Bracing rib for high rigidity and a tight, secure hold on flexible conduits.
- Engineered for high-quality, reliable fastening.
- Quick, cost-efficient fastening.

X-EKS-E MX

- Easy and convenient fastening of flexible and rigid conduits.
- Quick and cost-efficient installation method for electrical conduit applications.

X-EHS M MX

- Virtually dust-free fastening
- Quick, cost-efficient fastening

X-ECC MX

- Metal ceiling clip for light duty electrical/mechanical fastenings on ceilings and use with collated nails.

X-P B3 MX

- Ultimate-performance nail for soft and some tough concrete
- Available in lengths up to 24 mm.

X-C B3 MX

- Premium nail for excellent performance on soft concrete
- Economical standard nail with cut tip.

X-S B3 MX

- Ultimate-performance nail for steel.
- Long, conical tip and high hardness – for excellent fastening quality.

SOFTWARE SOLUTIONS & SERVICES

DRILLING & CUTTING

Electrical

Tackle your drilling, chipping, and cutting jobs for activities like cable tray fixings, building concealed conduits, metal drilling, floor breaking for concealed piping/cablings etc. with tools & inserts designed specifically for electrical trade.

ROTARY HAMMERS

- A range of everyday hammers for drilling in concrete, masonry, and natural stone.
- The models include TE-1, TE-2, TE-2M, TE-7, TE-7C, TE 3.
 - TE-1 - Optimum drilling range - 4 to 10 mm
 - TE 2/2M - Optimum drilling range - 4 to 12 mm
 - TE 7/7C - Optimum drilling range 4 to 16 mm
 - TE 2-A22 - Cordless tool with Optimum drilling range of 4 to 12 mm
 - TE 3 - Optimum drilling range 6 to 16 mm

DIAMOND CORING TOOL DD 160/ DD 120

- Ideal for making penetrations for electrical cables, ducts, pipes, openings for ventilation, stitch drilling for breaches, and coring holes for service entries.

SOFTWARE SOLUTIONS & SERVICES

UD 4 CORDED DRILL DRIVER

- One of the lightest and smaller tools in its category.
- Designed to outperform any job type according to your requirements.

BREAKER TE 500-X

- Suitable for moderately heavy chiseling work on concrete and masonry (mainly on walls).
- Useful in building a concealed conduit application.

BREAKER TE 800-AVR

- Rugged, high-performance breaker/demolition hammer for working on walls and floors.
- Includes features like low vibration and long tool life.

CUTTING/GRINDING DISCS

- Suitable for cutting of threaded rods and angle supports during installation of cable trays.
- Ideal for cable tray cutting to prepare assemblies on site.
- Easy availability of grinding discs available for weld preparation etc.

HSS R DRILL BITS

- Basic HSS roll-forged drill bit for drilling small holes in metal.
- Includes spiral flute for faster drilling and easy chip removal
- Features an added benefit of optimized lubrication and heat reduction.

P LINE BLADES

- Suitable for making cuts in masonry, brick & concrete.
- Good general purpose blade that comes in Hilti quality.

FIRESTOP FOR ELECTRICAL OPENINGS

Electrical

Tackle your data communication jobs with the tools, fasteners, and fire protection products for HVAC controls, security surveillance, audio/ video, or fire alarms.

FIRESTOP BLOCK CFS-BL

- Ideal for temporary or permanent cable seals, cable trays, and pipes in wall and floor openings.
- Non-curing, reusable solution for medium to large openings.
- Requires no compression or special tools.
- One-person installation technique.

STAINLESS STEEL FIRESTOP COMPOSITE SHEET

- Firestop large openings with the composite sheet and Hilti gas-actuated tool - no drilling or anchors needed.
- Customizable multi-board systems; nonmagnetic with no inductive loss in cables.
- Compatible with the Hilti Speed Sleeve and gangplate.

FIRESTOP SPEED SLEEVE CP 653 BA

- Provides quick and easy firestopping for single and bundled cables.
- Becomes re-penetrable and offers optimal smoke migration performance with just one twist.
- Suitable for small to medium sized openings in walls, ceilings, and floors.
- Can be used in concrete, masonry, and drywall.

CP 660 FLEXIBLE FIRESTOP FOAM

- Versatile – single cables, bundles, trays, trunking and mixed penetrations (metal and plastic pipes).
- Future-proof – re-penetrable to allow future cable capacity increases.
- Easily shaped during curing phase – leftovers can be cut and reused.
- Single-sided installation possible.

FS-ONE MAX FIRESTOP INTUMESCENT SEALANT

- Versatile – single cables, bundles, trays, trunking and mixed penetrations (metal and plastic pipes).
- Future-proof – re-penetrable to allow future cable capacity increases.
- Easily shaped during curing phase – leftovers can be cut and reused
- Single-sided installation possible.

HILTI CONNECT

Hassle-free tool
services at your
fingertips

Welcome to the world of connected tools!

MAKING JOBSITE TASKS EASIER!

Sometimes in life, the simplest things turn into the most difficult.

We have all been there. Whether it is repairing a broken washing machine, identifying your child's jacket or checking if your bike is under warranty, sometimes things are just never easy.

Unfortunately, we can't help you with everyday hassles in your personal life, but on the jobsite we are always looking to make your work easier

FEATURES

We have designed the Hilti Connect App to solve annoyances like:

Order a repair,
directly on-the-job?

Find out the
tool's repair cost
& service status

Identify your tool by
quickly scanning the
tool's NFC

Find & order
related products
for your tools

Quickly train your
team on the use
of a tool

All you need is your smartphone and the Hilti Connect App to quickly and easily tackle challenges like this, and much more, directly on the jobsite.

With transparency comes efficiency!

With transparency comes efficiency!

WHAT ON!TRACK CUSTOMERS ARE SAYING

“

On!Track is very useful for us. We encountered no problem with the app. ”

- Aimee Balanial, Teravera

“

On!Track is very beneficial especially when they gave me access to the app. I can update it immediately if I have new deliveries and assets. I can track the items easily. ”

- Ron Valdez, Euler

Some of the biggest jobsite efficiency killers are tools and assets that are broken, misplaced or mismanaged. These problems don't just slow you down, they also cost you money. Our ON!Track Asset Management can help you keep track of your tools and other assets and streamline your business.

HOW ASSET MANAGEMENT WORKS

Our specially trained team members will visit your worksite to understand your unique needs and design and implement a solution that's tailored just for you. We combine the latest technology with jobsite-friendly processes to make sure that you always know the answers to questions like, "Where is that tool?" and "Who was using it last?"

HARDWARE

HILTI TOOL SERVICE

Leading the Industry with our Tool service time promise

Be worry-free with our unique warranty model ensuring optimum value for your money.

WHY 2-1-3

We don't forget our customers after we make a sale. On the contrary, our relationship with our customers has just begun. Our 2-1-3 model is a way by which we nurture this relationship and assure our customers their money's worth. We deliver our customers the best quality in the engineering of products that guarantee top-notch standards of the tool-make. We are so confident of our products' caliber; we can give our customers an exemplary warranty model that leaves you worry-free for years.

* For Metro Manila customers only

DECODING THE 2-1-3 WARRANTY MODEL

2 Years No Cost Warranty on Heavy Duty Tools

Hilti resolves to repair your tool free of cost for 2 years from the date of purchase. This includes replacement of defective parts, wear and tear parts, labor cost, etc. It also includes free pick-up and delivery.

1 Month Repair Warranty

Hilti will repair your tool for free within a month after your last charged repair. This also includes parts for wear and tear.

3 Years Repair Cost Limit (RCL)

After the "No Cost period", Hilti will charge a maximum of 20% of the list price of a new tool for repairs. RCL is valid for 3 years from the date of purchase of the tool.

REPAIR COST LIMIT (RCL)

No shocks when you receive your bill

- Repair costs are capped after warranty
- Repair costs will only be at RCL or lower

Let's get started right away - repair cost pre-approvals

- A repair quote can delay the entire repair process by 5-14 days.
- With your consent, we'd like to start work on your tool right away. By pre-approving charged repair costs up to the repair cost limit, you eliminate the quotation process – meaning we won't delay repair work and less downtime for you.

Super fast and reliable

- We'll collect, repair and return your tool to site, faster than any other tool repair service.
- We even guarantee 3 working days turnaround time. If we fail, your repair is *free!

*Conditions apply for Metro Manila only. Refer to T&Cs for details.

FLEET MANAGEMENT

Taking control of your tools to help protect your business from hidden costs

Tooling up for a project is a major investment—and a massive undertaking. With Fleet Management solutions from Hilti, you can eliminate many of the headaches associated with managing the tools you need to complete a project.

WHAT IS HILTI TOOL FLEET MANAGEMENT?

Construction projects come with enough problems for you to solve. Tool management shouldn't be one of them. With our Tool Fleet Management program, we'll help make sure you have the tools you need at every stage of your project.

Choose from a wide selection of tools, and then pay a fixed monthly rate for a defined period of time. To keep you working at peak performance, we help you track, repair, replace, and upgrade your tools at no additional cost.

The Hilti Fleet Management Program offers benefits for every member of your team

Performance	Controlling overhead	Repair cost and down-time	Day-to-day productivity
<ul style="list-style-type: none"> Give you team the most productive tools, all the time. 	<ul style="list-style-type: none"> Control your tool costs and eliminate surprises. 	<ul style="list-style-type: none"> All of the tools, none of the costs. 	<ul style="list-style-type: none"> If a tool breaks down, your project doesn't.

BENEFITS FOR FLEET CUSTOMERS

With Hilti Tool Fleet Management, there is no upfront capital investment to tool-up for a job. Instead, there is a fixed monthly rate and a defined usage time for the tools you need, with an advanced tool coverage service that includes the following:

Controlled costs <ul style="list-style-type: none"> All-inclusive Repairs Fixed Monthly Costs Theft Coverage 	Predictable performance <ul style="list-style-type: none"> Loaner Tools Tool Upgrades 	Easier tracking <ul style="list-style-type: none"> Tool Inventory and Labeling
--	--	--

TOOLS ON DEMAND

Hilti's Tools On Demand program lets you get the tools you need when you need them and return them when you don't. This puts you in control of your tool inventory and helps minimize your overall total annual tool spend.

How Hilti's On!Demand Program works:

Tool Up

When you begin a new project, or a stage of a project has greater manpower demands, you can Tool UP to meet those needs. Pre-planning your project and setting a timeline for tool needs is crucial to the success of your project.

Tool Repair

If you do experience a tool breakdown, just let us know and we will ship you a replacement tool, typically next business morning. We will provide you with a return label for the broken tool to return to us.

Tool Down

Demobilizing your Tools On Demand tools when they are no longer needed on the project is simple. Just contact our Tool Services team via phone or email. Let them know what tools you need to Tool DOWN and they will provide you with shipping labels to return the tools.

Save Money

Minimizing your total tool spend in Peso and eliminating soft costs of moving tools from site to site provides you with the opportunity to maximize your productivity and profit. We have tools that fit all trades.

SOFTWARE SOLUTIONS & SERVICES

SOFTWARE, SOLUTIONS & SERVICES

Customized
support for
engineers

Our engineering software and services support you to identify effective solutions for your complex design problems in a fraction of the time.

PROFIS ENGINEERING

Taking your Anchoring to Concrete design to the next level

PROFIS Engineering is the latest transformation of our industry leading software, PROFIS Anchor. PROFIS software has always made designing the most complex and challenging structural connections easy. Now, with the addition of base plate analysis and compatibility with popular 3D modelling software anchor design has never been easier.

BENEFITS OF PROFIS ENGINEERING AT A GLANCE

Reduce design time

Perform anchor and baseplate calculations in a single step to reduce overall design time.

Improve accuracy

Ensure your specifications are right the first time. Automatic load transfers, simultaneous multiple load combination processing, and BIM / CAD model generation all help to reduce errors and rework.

Increase efficiency

Integrated data sharing in a single platform grants every stakeholder immediate access to the most up-to-date design files and reports. This helps to improve transparency, remove communication logjams and increase efficiency.

GAME CHANGING FEATURES

Comprehensive calculating

Anchoring in concrete and masonry capabilities make it easy to complete your entire baseplate connection in one simple software.

Base Plate Analysis

Analyze your base plate using local standard design guide or a finite element methodology to determine if your base plate is rigid.

Keep Stakeholders Up-to-Date

An integrated cloud-based platform keeps stakeholders connected and data up to date. It also means you can access your designs from any device in any location, even on the go.

Autocad and Tekla interface

Easy transfer of data into Autocad or Tekla software to enable users to create and manage 3D structural models in concrete or steel without complications or re-work.

Flexible reporting

Customisable reporting allows you to produce accurate, comprehensive, and personalised reports for your unique projects.

Expert support

Integrated step-by-step tutorials and Hilti engineering support mean you never have to address complex design challenges alone.
