ABOUT HILTI

At Hilti, we make and design leading cutting-edge technology, software, and services, empowering the professional construction industry. With a global presence in over 120 countries and more than 23,000 employees, we offer a 360-degree service for your build – from software for design, products, and tools for work onsite to training, repairs, testing, and consultancy. We create technologies, software, and services, which are aimed to drive innovation and stand out from the competition. Our technologies are

known to support the achievement of many admirable feats in the field of engineering across the world. Our commitment to our customers is the epitome, and that is why two-thirds of our Hilti team members are focused on working directly with our customers every day. With our one-of-a-kind services, the industry's best warranty, and specialists in areas like structural engineering and fire protection, we have become a brand to be reckoned with among Construction professionals.

APPLICATION

Infra

Our unique range of products, services, and software always come with personal, expert support. From design to demolition, our primary goal is to provide the right apparatus to help you perform your job impeccably.

LAYOUT & DETECTION

Infra

Augment job site efficiency and accuracy with specially designed measuring systems, model support team, and unique software packages.

ROTATING LASER PR 2-HS A12

- PulsePower technology enables outstanding visibility even in bright daylight.
- Lithium-ion battery, featuring Cordless Power Care (CPC) for longer-lasting power output, charges within 35 minutes.
- Extended 12 cm laser receiver window for quick detection of the laser beam over the entire working range.

LASER RANGE METER PD-S

- Measuring distances from 0.2 - 60 m / 0.6 - 200 ft quickly and accurately environments.
- Measuring areas to calculate paint, flooring or concrete quantities.
- Measuring distances and heights where traditional measuring methods fail.
- Protected against dirt, dust and splashing water.
- Rugged and durable to resist hard jobsite environments.

PS 300 FERROSCAN

- Integrated display provides rebar layout visuals in top view and sectional view for on-the-spot structural analysis.
- Smart algorithm helps accurate depth measurements for rebar.
- Wide sensor area enables quick and easy scan over large areas.

X-SCAN SYSTEM PS 1000

- Helps you avoid hitting concealed objects when drilling anchor holes, breaking out openings, diamond coring, or sawing.
- Provides a real-time view of the inside of concrete structures and generates true images automatically.
- Allows accurate evaluation of on-site without the need for expert skills.

BREAKING / DEMOLITION

Infra

Enhance your demolition jobs with high-performance equipment and hammers suitable for working on walls and floors.

BREAKER TE 3000-AVR

- One of a kind breaker that delivers 68 joules of hammering impact, breaking up to six tons of concrete in just one hour.
- Goes head to head with air tools but doesn't use a compressor, making it easier to use and transport.
- It is highly versatile, engineered to last, easy to operate, and ready to use in minutes.
- Allows longer work time between service or repair cycles due to a three-chamber sealing system and active cooling design.

BREAKER TE 1000-AVR

- This redesigned breaker has higher impact energy for up to 50% more productivity.
- Comes with a brushless motor and the lowest vibration in its class.
- It is optimized for floor and lower wall breaking.
- The detachable supply cord makes for quick and easy replacement of damaged/ broken supply cords to keep your job moving forward.

TE 2000-AVR

- Very low weight makes the tool easy to handle and maneuver in medium-duty concrete demolition jobs.
- T-handle design for efficient performance and maximum working comfort on floor demolition jobs.
- Minimal vibration of 4.8 m/s² according to EN 60745-2-6.
- Versatile, easy to operate, easy to transport and ready for use in minutes.
- Longer service intervals and prolonged lifespan thanks to the brushless, maintenance-free SR motor.

BREAKER TE 800-AVR

- The concrete breaker featuring Hi- Drive is the ultimate tool for horizontal or vertical breaking. energy and innovative Hilti chisels
- Exceptionally low vibration level thanks to Hilti's innovative AVR (Active Vibration Reduction) sub-chassis system.

POLYGON CHISELS

- Innovative design with self-sharpening tip profile offer increased splitting power for higher chiselling performance.
- Reduced sticking in concrete or masonry.
- Induction hardening provides high reliability with low risk of breakage.
- Deliver a consistently high performance over the entire service life of the chisel.

BREAKER TE 500-X

- TE 500 X is 14% lighter with great weight balance with a dedicated front grip for easy handling and smooth starting behavior.
- New intelligent air flow concept, ensures that the tool does not heat up unbearably during use.

REBAR & ANCHORING

Infra

Minimize significant efforts in drilling and installation tasks with Hilti SafeSet™ Technology's non-cleaning/self-cleaning mechanism.

TE 6-A36

- Extremely powerful rotary hammer, designed for serial anchor drilling.
- Virtually dustless drilling with the DRS-6-A dust removal system.
- Active Vibration Reduction (AVR) system designed to increase user comfort and productivity.
- High runtime flexibility thanks to two compatible, fast-charging Hilti 36 V Li-ion batteries – 'standard' and 'industrial'.

TE-YX DRILL BITS

- Solid carbide head for top performance, maximum reliability and less jamming when hitting rebar.
- Heat treated flute for less wear, and ductile core for a robust drill bit body.
- Slimmer and lighter helix for more comfortable drilling and superior drilling speed.
- Drill bit head embedded on four sides for maximum durability and longer life.

COMBIHAMMER TE 70 AVR

- Comes with best-in-class operator safety and comfort with its advanced Active Vibration Reduction system.
- Drills 40% faster than other combis.

VACUUM CLEANER VC 20-U

- Universal wet and dry vacuum cleaner with automatic filter cleaning and a tank capacity of 21 liters.
- Comes with the industry's best tool warranty.
- Features technology for consistently high suction performance.

SAFESET TECHNOLOGY WITH HIT-HY 200

- The SafeSet™ indicates that an adhesive anchor is approved for installation using one of our noncleaning or self-cleaning systems.
- Easy to use, self-cleaning installation uses a Hilti hollow drill bit to drill the anchor hole.

INJECTABLE MORTAR HIT-HY 200 R

- Enables installation of adhesive anchors more quickly and reliably.
- SafeSet™ Technology includes Hilti hollow drill bits, vacuum cleaners, HIT-HY 200 and the HIT-Z anchor rod.

INJECTABLE MORTAR HIT-RE 500 V3

- Suitable for use in cracked and uncracked concrete with all anchoring elements.
- Possesses approval for use in seismic applications.
- Delivers reliable high performance in diamond-cored holes using the new roughening tool.

ANCHOR ROD PORTFOLIO

Our anchor rod portfolio and adhesive anchors let you pick the right solution for your specific needs:

- HIT-Z: provides the ultimate in reliability with up to 60% faster installation due to zero-cleaning SafeSet™ Technology.
- HAS-U: includes high-strength, hot dip galvanized, and stainless steel for an increased performance with injectable adhesives and capsule systems.
- HIT-C: reliably fulfills the basic needs of chemical anchoring applications.

CONCRETE CUTTING & CORING

Infra

Deliver superior results with coring and drilling tools designed for a powerful performance for a wide range of applications, be it light or heavy-duty cutting and coring.

DIAMOND DRILLING TOOL DD 200

- Ideal for Big dia and deeper core drilling in metro, tunnels, walls, and floors without hammering or vibration.
- Suitable for making penetrations for ducts, pipes and cables, openings for ventilation, stitch drilling for breaches, and coring holes for service entries.

DIAMOND CORING TOOLS - DD120, DD160, DD200

- A wide range of coring tools to choose from based on diameter of coring and base material.
- Comes with a unique lifetime service offering.
- Compact, lightweight unit – for much easier handling.
- Power control LED – shows even inexperienced users how to achieve the optimum drilling speed and maximise core bit life.

DIAMOND CORE BITS - UCL - A

- Our UCL portfolio enables better cutting speed and core bit.
- The unique concept of change module ensures optimum performance.
- Adjust budgetary requirements by just changing the cutting portion of the core bit.

MULTILINE DIAMOND CUP WHEELS

- Ideal for the finish of grinding of concrete, steel, and natural stone.
- Offer long life and unique pin holes for better segment cooling, giving you faster progress.

DCH 300-X

- Depth gauge – allows full control of the cutting depth in 10 mm steps from 40-120 mm.
- Ensures a virtually dust-free job site when used with a compatible vacuum cleaner.

SPX UNIVERSAL

- Equidist technology provides superior cutting speed and performance on reinforced concrete.

GENERAL DRILLING & FASTENING SOLUTION

Infra

Facilitate quick and easy fastening solutions with a wide range of internationally approved drillers and fasteners designed to rebar applications on concrete and masonry.

POWER-ACTUATED TOOL GX 3

- Fully automatic power-actuated tool fastens everything from the waterproof membrane in tunnels, roads as well as grating to concrete and steel.
- The fully automatic cartridge advance and piston return systems give you a higher fastening rate without manually cycling the tool.

GENERAL PURPOSE COLLATED NAILS FOR CONCRETE X-P MX

- These collated strips increase productivity and make it easier to load fasteners.

SAFETY STUD ANCHOR HST3

- Delivers industry-leading performance, versatility, and safety.
- Provides the best combination of embedment depths, base materials, loads, and edge and space distances in the market.

HEAVY DUTY ANCHOR HSL-3

- Torque-controlled expansion bolt designed for high performance in a static and dynamic application.
- Ideal for crash barriers, tunnel fastenings, and base plate fixing.

CORDLESS ROTARY HAMMER TE 6-A36

- It is the latest in a long line of advances in rotary technology.
- Includes a chiseling feature that facilitates a virtually dust-free light duty/corrective chipping with the TE 6-A dust removal system (DRS).

TE 3-ML

- Triple-mode SDS rotary hammer (hammer drilling, rotary-only drilling and chiselling) for multiple applications.
- Sturdy motor provides high performance and overload protection.
- Includes Hilti Cooltec with active cooling to extend tool lifetime.

HILTI CONNECT

Hassle-free tool
services at your
fingertips

Welcome to the world of connected tools!

MAKING JOBSITE TASKS EASIER!

Sometimes in life, the simplest things turn into the most difficult.

We have all been there. Whether it is repairing a broken washing machine, identifying your child's jacket or checking if your bike is under warranty, sometimes things are just never easy.

Unfortunately, we can't help you with everyday hassles in your personal life, but on the jobsite we are always looking to make your work easier

FEATURES

We have designed the Hilti Connect App to solve annoyances like:

Order a repair,
directly on-the-job?

Find out the
tool's repair cost
& service status

Identify your tool by
quickly scanning the
tool's NFC

Find & order
related products
for your tools

Quickly train your
team on the use
of a tool

All you need is your smartphone and the Hilti Connect App to quickly and easily tackle challenges like this, and much more, directly on the jobsite.

With transparency comes efficiency!

With transparency comes efficiency!

WHAT ON!TRACK CUSTOMERS ARE SAYING

On!Track is very useful for us. We encountered no problem with the app. ”

- Aimee Balanial, Teravera

On!Track is very beneficial especially when they gave me access to the app. I can update it immediately if I have new deliveries and assets. I can track the items easily. ”

- Ron Valdez, Euler

Some of the biggest jobsite efficiency killers are tools and assets that are broken, misplaced or mismanaged. These problems don't just slow you down, they also cost you money. Our ON!Track Asset Management can help you keep track of your tools and other assets and streamline your business.

HOW ASSET MANAGEMENT WORKS

Our specially trained team members will visit your worksite to understand your unique needs and design and implement a solution that's tailored just for you. We combine the latest technology with jobsite-friendly processes to make sure that you always know the answers to questions like, "Where is that tool?" and "Who was using it last?"

HARDWARE

Smart Tags

SOFTWARE

Free smartphone app (iOS and Android) for an unlimited number of users

SERVICE

Onsite consultation and training, asset tagging, data upload, and best-in-class customer support

WHAT IT TRACKS

ON!Track is designed to manage all of your assets irrespective of its brand or manufacturer. This tracking solution is adept at tracking more than just tools.

HILTI TOOL SERVICE

Leading the Industry with our Tool service time promise

Be worry-free with our unique warranty model ensuring optimum value for your money.

WHY 2-1-3

We don't forget our customers after we make a sale. On the contrary, our relationship with our customers has just begun. Our 2-1-3 model is a way by which we nurture this relationship and assure our customers their money's worth. We deliver our customers the best quality in the engineering of products that guarantee top-notch standards of the tool-make. We are so confident of our products' caliber; we can give our customers an exemplary warranty model that leaves you worry-free for years.

* For Metro Manila customers only

DECODING THE 2-1-3 WARRANTY MODEL

2 Years No Cost Warranty on Heavy Duty Tools

Hilti resolves to repair your tool free of cost for 2 years from the date of purchase. This includes replacement of defective parts, wear and tear parts, labor cost, etc. It also includes free pick-up and delivery.

1 Month Repair Warranty

Hilti will repair your tool for free within a month after your last charged repair. This also includes parts for wear and tear.

3 Years Repair Cost Limit (RCL)

After the "No Cost period", Hilti will charge a maximum of 20% of the list price of a new tool for repairs. RCL is valid for 3 years from the date of purchase of the tool.

2-1-7 WARRANTY MODEL FOR PROVINCIAL CUSTOMERS

For Provincial customers we provide a list of Pick-up and Delivery points you can use which are well within your reach, Just contact us by phone or online and we'll do the rest. Every Hilti tool is registered, so there's no proof of purchase required.

REPAIR COST LIMIT (RCL)

No shocks when you receive your bill

- Repair costs are capped after warranty
- Repair costs will only be at RCL or lower

Let's get started right away - repair cost pre-approvals

- A repair quote can delay the entire repair process by 5-14 days.
- With your consent, we'd like to start work on your tool right away. By pre-approving charged repair costs up to the repair cost limit, you eliminate the quotation process – meaning we won't delay repair work and less downtime for you.

Super fast and reliable

- We'll collect, repair and return your tool to site, faster than any other tool repair service.
- We even guarantee 3 working days turnaround time. If we fail, your repair is *free!

*Conditions apply for Metro Manila only. Refer to T&Cs for details.

FLEET MANAGEMENT

Taking control of your tools to help protect your business from hidden costs

Tooling up for a project is a major investment—and a massive undertaking. With Fleet Management solutions from Hilti, you can eliminate many of the headaches associated with managing the tools you need to complete a project.

WHAT IS HILTI TOOL FLEET MANAGEMENT?

Construction projects come with enough problems for you to solve. Tool management shouldn't be one of them. With our Tool Fleet Management program, we'll help make sure you have the tools you need at every stage of your project.

Choose from a wide selection of tools, and then pay a fixed monthly rate for a defined period of time. To keep you working at peak performance, we help you track, repair, replace, and upgrade your tools at no additional cost.

The Hilti Fleet Management Program offers benefits for every member of your team

Performance	Controlling overhead	Repair cost and down-time	Day-to-day productivity
<ul style="list-style-type: none"> • Give you team the most productive tools, all the time. 	<ul style="list-style-type: none"> • Control your tool costs and eliminate surprises. 	<ul style="list-style-type: none"> • All of the tools, none of the costs. 	<ul style="list-style-type: none"> • If a tool breaks down, your project doesn't.

BENEFITS FOR FLEET CUSTOMERS

With Hilti Tool Fleet Management, there is no upfront capital investment to tool-up for a job. Instead, there is a fixed monthly rate and a defined usage time for the tools you need, with an advanced tool coverage service that includes the following:

Controlled costs <ul style="list-style-type: none"> • All-inclusive Repairs • Fixed Monthly Costs • Theft Coverage 	Predictable performance <ul style="list-style-type: none"> • Loaner Tools • Tool Upgrades 	Easier tracking <ul style="list-style-type: none"> • Tool Inventory and Labeling
--	--	--

TOOLS ON DEMAND

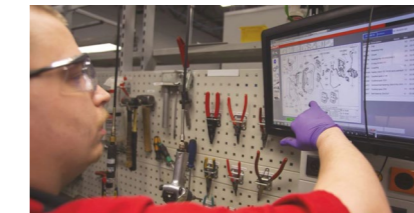

Hilti's Tools On Demand program lets you get the tools you need when you need them and return them when you don't. This puts you in control of your tool inventory and helps minimize your overall total annual tool spend.

How Hilti's On!Demand Program works:

Tool Up

When you begin a new project, or a stage of a project has greater manpower demands, you can Tool UP to meet those needs. Pre-planning your project and setting a timeline for tool needs is crucial to the success of your project.

Tool Repair

If you do experience a tool breakdown, just let us know and we will ship you a replacement tool, typically next business morning. We will provide you with a return label for the broken tool to return to us.

Tool Down

Demobilizing your Tools On Demand tools when they are no longer needed on the project is simple. Just contact our Tool Services team via phone or email. Let them know what tools you need to Tool DOWN and they will provide you with shipping labels to return the tools.

Save Money

Minimizing your total tool spend in Peso and eliminating soft costs of moving tools from site to site provides you with the opportunity to maximize your productivity and profit. We have tools that fit all trades.

SOFTWARE, SOLUTIONS & SERVICES

Customized support for engineers

Our engineering software and services support you to identify effective solutions for your complex design problems in a fraction of the time.

PROFIS ENGINEERING

Taking your Anchoring to Concrete design to the next level

PROFIS Engineering is the latest transformation of our industry leading software, PROFIS Anchor. PROFIS software has always made designing the most complex and challenging structural connections easy. Now, with the addition of base plate analysis and compatibility with popular 3D modelling software anchor design has never been easier.

BENEFITS OF PROFIS ENGINEERING AT A GLANCE

Reduce design time

Perform anchor and baseplate calculations in a single step to reduce overall design time.

Improve accuracy

Ensure your specifications are right the first time. Automatic load transfers, simultaneous multiple load combination processing, and BIM / CAD model generation all help to reduce errors and rework.

Increase efficiency

Integrated data sharing in a single platform grants every stakeholder immediate access to the most up-to-date design files and reports. This helps to improve transparency, remove communication logjams and increase efficiency.

GAME CHANGING FEATURES

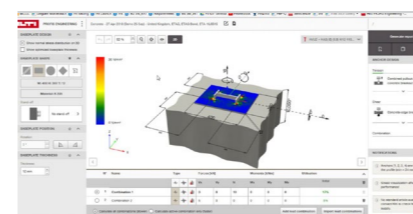

Comprehensive calculating

Anchoring in concrete and masonry capabilities make it easy to complete your entire baseplate connection in one simple software.

Base Plate Analysis

Analyze your base plate using local standard design guide or a finite element methodology to determine if your base plate is rigid.

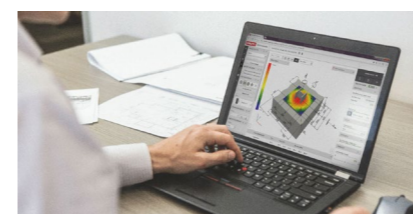

Keep Stakeholders Up-to-Date

An integrated cloud-based platform keeps stakeholders connected and data up to date. It also means you can access your designs from any device in any location, even on the go.

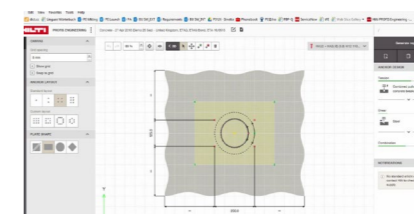

Autocad and Tekla interface

Easy transfer of data into Autocad or Tekla software to enable users to create and manage 3D structural models in concrete or steel without complications or re-work.

Flexible reporting

Customisable reporting allows you to produce accurate, comprehensive, and personalised reports for your unique projects.

Expert support

Integrated step-by-step tutorials and Hilti engineering support mean you never have to address complex design challenges alone.
